 54.73%

Quarterly Average Ratio is calculated as the arithmetic mean of the average of each month's average Ratio for the three months of the quarter computed in accordance with Banking Liquidity Rules.

LIQUIDITY RISK MANAGEMENT

The Liquidity risk management of Indian Overseas Bank (IOB), Hong Kong Branch is part of the IOB's group risk management processes. The objective of liquidity risk management is to ensure that there are sufficient funds to meet contractual and regulatory financial obligations and to undertake new transactions.

Liquidity risk management is a component of the IOB HK Branch's asset and liability management framework.

The liquidity risk management frame comprises of the following:

- Roles and responsibilities, organizational structure for oversight and communications of the IOB's liquidity risk management;
- · Operational liquidity risk management;
- · Periodic reporting of liquidity positions
- · Managing funding sources and access to markets; and
- Liquidity contingency plan that establishes indicators to alert senior management to potential liquidity and funding problems.

The Hong Kong Asset and Liability Committee ("ALCO") comprising key members from local management and Treasury, conducts meeting on a regular basis to review the daily liquidity reports and deliberate important liquidity risk management matters.

The IOB Branch's liquidity management framework is supported by key liquidity measures, which are monitored on an on-going basis. These measures further serve as early warning indicators ("EWI") to alert senior management of potential liquidity and funding distress situations and trigger management actions in response to the event. The EWIs are designed taking into consideration the Branch's funding profile as well as the market conditions, and are calibrated to differentiate the various level of severity in liquidity shortfall. The EWIs are monitored regularly and discussed at the ALCO.

INDIAN OVERSEAS BANK, HONG KONG

INTERIM DISCLOSURE STATEMENT SECTION A - BRANCH INFORMATION (HONG KONG ONLY)

III. Additional Information - continued

Liquidity Monitoring

IOB HK Branch manages the operational liquidity by cash flows on an individual currency basis by cash flow mismatch analysis under defined business scenarios. Short-term liquidity stress tests are performed based on an institution-specific crisis scenario, a general market crisis scenario and a combined scenario. The results of the stress tests are used to adjust liquidity risk management strategies, policies and positions and to develop effective contingency funding plans. Liquidity monitoring is performed daily within the framework for projecting cash flows on a contractual basis. Simulations of liquidity exposures under stressed market scenarios are performed and the results are taken into account in the risk management processes.

IOB HK Branch follows the applicable guidance set forth by the HKMA in Supervisory Policy Manual LM-2 "Sound Systems and Controls for Liquidity risk Management".

Liquidity Reporting

In-house systems and procedures are in place to meet the various reporting requirements. The systems include data from different sources with relevant mapping rules to generate internal and local regulatory reports. Daily cash flow mismatch reports are produced by using contractual cash flows in the balance sheets and placing them into appropriate time basis. The measurement and reporting of liquidity would be on a cumulative cash flow mismatch basis for each currency. The daily reporting regulatory reports for Liquidity Maintenance Ratio are prepared in accordance with the relevant reporting requirements.

Funding Strategy

The liquidity and funding positions of IOB HK Branch is managed at Hong Kong. The Branch maintains a diverse range of funding sources. Apart from obtaining the funding from interbank markets, the non-bank customer deposits also form a part of the Branch's overall funding. In order to lengthen the duration of the funding, the Branch obtains intragroup funding at arm's length and borrowing in the money market.

Contingency Planning

The Contingency Funding Plan ("CFP") is a critical component of the liquidity management framework and serves as an extension of the IOB HK Branch's operational or daily management policy. A liquidity crisis can arise due to Market-driven and/or Firm-driven events. A 3-stage approach (Green/Amber/Red) is adopted to differentiate the various statges of the liquidity and funding condition.

11. Remuneration System

The senior management and the key personnel of the branch are Bank's officers from India, the remuneration package is on the lines decided by the Working Group of the Standing Committee by the Government of India, Ministry of Finance (Banking Division). The Standing Committee has been mandated to standardize the remuneration package to be paid to all India based officers of Indian public sector banks operating in various overseas centers including Hong Kong. The Committee meets at periodic intervals to review/revise the remuneration package taking into account cost of living, market situation, etc.

Remuneration of Senior Management and Key Personnel
